

## GUIDE FOR HELP IN USING INDEXES

### PART I

#### CEMETERY NAME INDEX

This is an everyname index of the information on pages 1 thru 45 only. Those pages contain both the information copied directly from the stones in the cemetery and, the names of plot owners and, in a few other cases, additional information from the available cemetery records. There was the normal difference of information between the two sources.

Maiden names are cross referenced.

### PART II

#### APPENDICES INDEX

This is a combined everyname index for both Appendix A and Appendix B.

##### Appendix A

There are many times when a name appears more than once on a single page. However, they are listed in the index only ONCE under THAT page number. To catch all possible references to any name on a page, please be sure to READ THE ENTIRE PAGE.

Maiden names or possible maiden names have been cross referenced, using surnames only.

##### Appendix B

These notes of Agnes L Anderson have many references to people where no SURNAME is given. These references are NOT in the index. It includes only the entries with full names. It will actually not take long to SCAN THE ENTIRE DIARY.

I have indexed these pages leaving all the varied spelling of names as I found them. Hopefully I have added as few variations of my own as possible.
